CLOUD COMPUTING SOLUTIONS

Our organization plays a critical role in delivering world class Cloud Computing Solutions that are customized specifically to meet each individual customer's environment and line of business.

Spotswood Consulting takes a consultative approach toward Cloud Computing that is based solely upon your business process, and the customer's line of business instead of the vast amount of technology solutions. As your trusted advisor we will work with you to identify the best fitting deliverables, and plan a strategy around the people and processes to successfully integrate the appropriate Cloud Computing Solution.

Spotswood Consulting offers Cloud Computing Solutions for mid-sized to enterprise clients. All of our Cloud Computing Solutions are customized to meet our client's business needs. Our goal is to reduce your overall IT costs and improve the integration of technology with the proper people, processes, and technology.

Spotswood Consulting's specializes in Cloud software and hardware that helps businesses of all sizes be more efficient and secure with less capital expenditures. We offer customers best-in-class hosted software and infrastructure tools like business class email, SharePoint and Cloud Servers, all hosted in ultra-secure, SAS 70 Type II audited, data center facilities, managed by a team of experts to maintain a 99.99% SLA.

Spotswood Consulting helps businesses get more computing resources with less capital investment. Our solutions provide mid-size to enterprise businesses the benefits of enterprise-class technology with a personal touch. Spotswood Consulting works with customers to find custom IT solutions that fit their needs and scales services – to provide the exact solution, tailored to fit their security, productivity and cost requirements for any stage of business growth. We offer our clients' services and solutions in every part of the cloud services gamut that enables organizations to adopt the cloud that is right for their business and needs, right now. Spotswood Consulting's portfolio of highly secure, scalable, and on-demand solutions include from private cloud deployments and traditional IT managed services as well as public cloud services for enterprises that deliver flexibility and choice.
